
OPEN DATA ANALYSIS (OSINT) CYBER SECURITY SERVICE

➤ Open-source intelligence (OSINT) is the first step in complete cybersecurity awareness of your brand. The result is a collection of information collected through various Internet channels, including the Dark-web. Information may contain leaked data, including: employee passwords, exploitable vulnerabilities, phone numbers, emails, business partners, outdated and unused resources, technologies used, usernames and other types of information leak...

➤ Open-source intelligence (OSINT) is the first step in complete cybersecurity awareness of your brand. The result is a collection of information collected through various Internet channels, including the Dark-web. Information may contain leaked data, including: employee passwords, exploitable vulnerabilities, phone numbers, emails, business partners, outdated and unused resources, technologies used, usernames and other types of information leaks.

All information will be collected and presented in the form of a report. Based on the received report, our team of cyber security specialists will be able to provide an assessment of your company's cyber security level. If no serious hazards are found, we will issue a certificate. In case of threats, we will advise on their prevention.

The service is provided by the www.seq.lv team of cyber security specialists. For questions, contact support@seq.lv or +371 2256 5353.
