
AUTOMATIC CONTACTLESS HAND SANITISERS

ROBOSPRAY

➤ Automatic contactless hand sanitisers - production and sales

➤ The main function of the contactless sanitation device is to reduce the spread of viruses, including the coronavirus Covid-19.

Our sanitisers are simple and reliable devices for contactless and quick hand hygiene. The liquid disinfectant solution is sprayed without having to touch the device, guaranteeing 100% sterility.

Robospray sanitisers are economical, safe and extremely easy to use. They do not require any maintenance, except for filling with disinfectant solution. The antiseptic agent is sprayed for 0.6 seconds, the volume of a single dose is 0.4 ml. The special nozzle creates an angled microspray of the antiseptic which guarantees that the solution enters the fine creases in the hands, completely covering the surface of the hands. The nozzles are placed at a height of 105 cm from the floor.

The area required for installing the sanitiser is no more than one square metre, and the device runs on a 220 V power supply.

The body is a solid structure finished with aluminium composi...
