
DISCONE ANTENNA VHF 30/90

➤ The antenna VHF 30/90 is a wide low band discone antenna, intended primarily for tactical use. The antenna elements are made of aluminium materials, ensuring low weight and excellent resistance against atmospheric influences. In spite of a low weight, the antenna is robust enough also for tactical use.

➤ The antenna VHF 30/90 is a wide low band discone antenna, intended primarily for tactical use. The antenna elements are made of aluminium materials, ensuring low weight and excellent resistance against atmospheric influences. In spite of a low weight, the antenna is robust enough also for tactical use. The antenna is composed of the support head with the tube where a special line transformer is built-in, of six disc elements and six cone elements, the last ones are divided into two sections. The construction is with a minimum possible number of the elements is achieved together with constant electrical characteristics and relatively small size for transportation. This construction enables a simple and quick erection. All antenna parts are packed in a handy transportable linen bag.

- Frequency range 30-90 MHz
- Impedance 50 Ohm
- VSWR <3
- Gain 2dBi
- Polarization - Vertical
- Maximum power 100W CW
- Radiation pattern H - omni
- Connector N fema...
