
ELECTRICAL SUPPLY

➤ We have considerable experience in electrical supply – we have designed and constructed electricity for such important facilities as data centres, where there are especially high requirements for electrical supply. We provide electrical supply in strategically important facilities – we design, build, and maintain any level of complexity of middle and low-voltage exterior networks (cable tracks, transformer stations) and interior networks (ligh...

➤ We have considerable experience in electrical supply – we have designed and constructed electricity for such important facilities as data centres, where there are especially high requirements for electrical supply. We provide electrical supply in strategically important facilities – **we design, build, and maintain any level of complexity of middle and low-voltage exterior networks** (cable tracks, transformer stations) **and interior networks** (lighting, continuous supply equipment, backup supply equipment, generators, automatic backup equipment, splitting systems, and power networks).

Full development cycle in one place. From consultations to construction and maintenance.
