MACHINE TRANSLATION FOR SAFETY AND DEFENCE AUTHORITIES BY TILDE
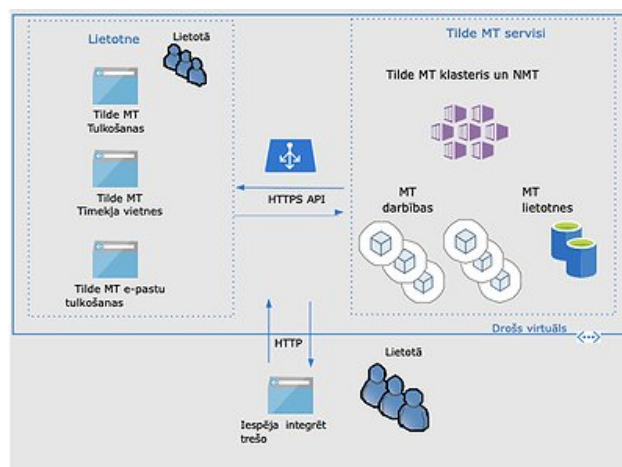

> **Tilde MT (Machinery translation) technologies based on artificial intelligence provide high-quality translation for defence related institutions and provide a safe environment for confidential translations.**

> **Artificial intelligence technologies provide a secure translation platform for the efficiency of the work of security and defence authorities and access to multilingual information.**

Technology security and installation

Technologies provide the highest data security standards allowing safe translation of confidential texts or documents. Tilde Technology data exchange and communication takes place via a secure encrypted channel (SSL). The translated texts or documents are neither saved nor analyzed on Tilde's MT platform. Documents and texts submitted for translation are deleted immediately after processing and cannot be restored. Tilde MT machine translation platform can be deployed in c...
